

DCT tanks with

Description and characteristics:

- Vertical tanks constructed of High-Density Polyethylene (HDPE) with UV resistance additive, Available in volumes of 20 to 2000 L.
- HDPE is a rot-resistant, long-lasting material highly-resistant to harmful chemicals.
- Interior walls have smooth surfaces for easy cleaning and prevention of aggregation and accumulation of debris.
- Low-weight for easy transport and better handling. Fully opening circular lid.
- Ease of placement for ducts through walls/flanges for connection of tubing.

DCT tanks with

Ref.	Volume (L)	Diameter (mm)	Length (mm)	Height (mm)	Lid (mm)
DCT20	20	290	-	300	ø300
DCT50	50	360	-	560	ø380
DCT100	100	460	-	700	ø480
DCT200	200	570	-	980	ø590
DCT300	300	610	-	1070	ø630
DCT500	500	820	-	1140	ø840
DCT1100	1100	1100	-	1400	ø11200
DCT2000	2000	1350	-	1620	ø1370
