

Large Capacity Horizontal Underground Tanks

Description and characteristics of underground models:

- Manufactured in High-Density Polyethylene (HDPE).
- Volumes from 5,000 to 75,000 L.
- Access to the interior through the lid.
- Easy transportation and installation.
- Sustainable and low in weight, long-lasting, food quality and anti-UV treatment, rot-proof, corrosion-resistant and easy to clean.
- Inlets and outlets can be placed in upper and lower areas for pipe connections.
- Lids available with security locks.

Use:

- Horizontal tanks in HDPE for storage of water and other liquids (Contact us to verify compatibility).
- Rainwater collection model equipped with: input filter, suction with anti-return valve and float, anti-turbulence discharge, upper discharge with animal anti-intrusion system, etc.
- Tanks can be reinforced for specific applications.

Large Capacity Horizontal Underground Tanks
